## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 1916.7 L/s |
| Fan Static Pressure .....                     | :           | 0.0442 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.1056 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.1056 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.1056 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.0442 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |
| -----   |             |            |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |
| -----                       |   |            |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.1056 kPa |
| Total Downstream Losses ..... | : | 0.1056 kPa |
| -----                         |   |            |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |
| *****                     |   |                |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 676.1 L/s  |
| Fan Static Pressure .....                     | :           | 0.5291 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.5905 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.5905 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.5905 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.5291 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.5905 kPa |
| Total Downstream Losses ..... | : | 0.5905 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Return System)

|   |             |             |
|---|-------------|-------------|
| Fan Airflow Rate .....                        | :           | 630.1 L/s   |
| Fan Static Pressure .....                     | :           | 0.0502 kPa  |
| <hr/>   |             |             |
| Total Pressure Difference Across Fan .....    | :           | 0.1117 kPa  |
| Static Pressure Difference Across Fan .....   | :           | 0.1117 kPa  |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa  |
| <hr/>   |             |             |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet   |
| <hr/>   |             |             |
| Total Pressure .....                          | -0.1117 kPa | 0.0000 kPa  |
| Static Pressure .....                         | -0.1731 kPa | -0.0614 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa  |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s    |

## Losses Upstream of Fan

|                             |   |             |
|-----------------------------|---|-------------|
| Return System Loss .....    | : | -0.1117 kPa |
| Filter Loss .....           | : | 0.0000 kPa  |
| Other Upstream Losses ..... | : | 0.0000 kPa  |
| Total Upstream Losses ..... | : | -0.1117 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| Total Downstream Losses ..... | : | 0.0000 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Return System)

|   |             |             |
|---|-------------|-------------|
| Fan Airflow Rate .....                        | :           | 584.1 L/s   |
| Fan Static Pressure .....                     | :           | 0.0422 kPa  |
| -----   |             |             |
| Total Pressure Difference Across Fan .....    | :           | 0.1037 kPa  |
| Static Pressure Difference Across Fan .....   | :           | 0.1037 kPa  |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa  |
| -----   |             |             |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet   |
| -----   |             |             |
| Total Pressure .....                          | -0.1037 kPa | 0.0000 kPa  |
| Static Pressure .....                         | -0.1651 kPa | -0.0614 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa  |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s    |

## Losses Upstream of Fan

|                             |   |             |
|-----------------------------|---|-------------|
| Return System Loss .....    | : | -0.1037 kPa |
| Filter Loss .....           | : | 0.0000 kPa  |
| Other Upstream Losses ..... | : | 0.0000 kPa  |
| Total Upstream Losses ..... | : | -0.1037 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| Total Downstream Losses ..... | : | 0.0000 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 1545.1 L/s |
| Fan Static Pressure .....                     | :           | 0.6580 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.7195 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.7195 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.7195 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.6580 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |
| -----   |             |            |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |
| -----                       |   |            |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.7195 kPa |
| Total Downstream Losses ..... | : | 0.7195 kPa |
| -----                         |   |            |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |
| *****                     |   |                |

## Fan Selection Parameters (Return System)

|   |             |             |
|---|-------------|-------------|
| Fan Airflow Rate .....                        | :           | 1390.2 L/s  |
| Fan Static Pressure .....                     | :           | 0.1521 kPa  |
| <hr/>   |             |             |
| Total Pressure Difference Across Fan .....    | :           | 0.2135 kPa  |
| Static Pressure Difference Across Fan .....   | :           | 0.2135 kPa  |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa  |
| <hr/>   |             |             |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet   |
| <hr/>   |             |             |
| Total Pressure .....                          | -0.2135 kPa | 0.0000 kPa  |
| Static Pressure .....                         | -0.2750 kPa | -0.0614 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa  |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s    |

## Losses Upstream of Fan

|                             |   |             |
|-----------------------------|---|-------------|
| Return System Loss .....    | : | -0.2135 kPa |
| Filter Loss .....           | : | 0.0000 kPa  |
| Other Upstream Losses ..... | : | 0.0000 kPa  |
| Total Upstream Losses ..... | : | -0.2135 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| Total Downstream Losses ..... | : | 0.0000 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 448.5 L/s  |
| Fan Static Pressure .....                     | :           | 0.1379 kPa |
| <hr/>   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.1994 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.1994 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| <hr/>   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| <hr/>   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.1994 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.1379 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.1994 kPa |
| Total Downstream Losses ..... | : | 0.1994 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 448.5 L/s  |
| Fan Static Pressure .....                     | :           | 0.1379 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.1994 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.1994 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.1994 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.1379 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.1994 kPa |
| Total Downstream Losses ..... | : | 0.1994 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... : 1233.0 L/s
Fan Static Pressure ..... : 0.2839 kPa
-----
Total Pressure Difference Across Fan ..... : 0.3453 kPa
Static Pressure Difference Across Fan ..... : 0.3453 kPa
Velocity Pressure Difference Across Fan ..... : 0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... : -0.3453 kPa                0.0000 kPa
Static Pressure ..... : -0.4067 kPa                -0.0614 kPa
Velocity Pressure ..... : 0.0614 kPa                0.0614 kPa
Velocity ..... : 10.0 m/s                10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... : -0.3453 kPa
Filter Loss ..... : 0.0000 kPa
Other Upstream Losses ..... : 0.0000 kPa
Total Upstream Losses ..... : -0.3453 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... : 0.0000 kPa
Other Downstream Losses ..... : 0.0000 kPa
Total Downstream Losses ..... : 0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... : 0.0 m
Temperature ..... : 12.8 C
Relative Humidity ..... : 100.0 %
Density ..... : 1.2296 kg/cu m
Viscosity ..... : 0.0040 sqm/s
Barometric Pressure ..... : 101.3260 kPa
Vapor Pressure ..... : 1.4734 kPa
-----

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 1361.1 L/s |
| Fan Static Pressure .....                     | :           | 0.1506 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.2120 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.2120 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.2120 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.1506 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |
| -----   |             |            |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |
| -----                       |   |            |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.2120 kPa |
| Total Downstream Losses ..... | : | 0.2120 kPa |
| -----                         |   |            |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |
| *****                     |   |                |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 1766.4 L/s |
| Fan Static Pressure .....                     | :           | 0.1131 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.1745 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.1745 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.1745 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.1131 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.1745 kPa |
| Total Downstream Losses ..... | : | 0.1745 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... : 1589.2 L/s
Fan Static Pressure ..... : 0.1512 kPa
-----
Total Pressure Difference Across Fan ..... : 0.2126 kPa
Static Pressure Difference Across Fan ..... : 0.2126 kPa
Velocity Pressure Difference Across Fan ..... : 0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... : -0.2126 kPa                0.0000 kPa
Static Pressure ..... : -0.2741 kPa                -0.0614 kPa
Velocity Pressure ..... : 0.0614 kPa                0.0614 kPa
Velocity ..... : 10.0 m/s                10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... : -0.2126 kPa
Filter Loss ..... : 0.0000 kPa
Other Upstream Losses ..... : 0.0000 kPa
Total Upstream Losses ..... : -0.2126 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... : 0.0000 kPa
Other Downstream Losses ..... : 0.0000 kPa
Total Downstream Losses ..... : 0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... : 0.0 m
Temperature ..... : 12.8 C
Relative Humidity ..... : 100.0 %
Density ..... : 1.2296 kg/cu m
Viscosity ..... : 0.0040 sqm/s
Barometric Pressure ..... : 101.3260 kPa
Vapor Pressure ..... : 1.4734 kPa
-----

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... :      526.5 L/s
Fan Static Pressure ..... :      0.1493 kPa
-----
Total Pressure Difference Across Fan ..... :      0.2108 kPa
Static Pressure Difference Across Fan ..... :      0.2108 kPa
Velocity Pressure Difference Across Fan ..... :      0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... :      -0.2108 kPa      0.0000 kPa
Static Pressure ..... :      -0.2722 kPa     -0.0614 kPa
Velocity Pressure ..... :      0.0614 kPa      0.0614 kPa
Velocity ..... :      10.0 m/s      10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... :      -0.2108 kPa
Filter Loss ..... :      0.0000 kPa
Other Upstream Losses ..... :      0.0000 kPa
Total Upstream Losses ..... :      -0.2108 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... :      0.0000 kPa
Other Downstream Losses ..... :      0.0000 kPa
Total Downstream Losses ..... :      0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... :      0.0 m
Temperature ..... :      12.8 C
Relative Humidity ..... :      100.0 %
Density ..... :      1.2296 kg/cu m
Viscosity ..... :      0.0040 sqm/s
Barometric Pressure ..... :      101.3260 kPa
Vapor Pressure ..... :      1.4734 kPa
-----

```

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 1395.6 L/s |
| Fan Static Pressure .....                     | :           | 0.0718 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.1332 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.1332 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.1332 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.0718 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |
| -----   |             |            |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |
| -----                       |   |            |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.1332 kPa |
| Total Downstream Losses ..... | : | 0.1332 kPa |
| -----                         |   |            |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |
| *****                     |   |                |

## Fan Selection Parameters (Return System)

|   |             |             |
|---|-------------|-------------|
| Fan Airflow Rate .....                        | :           | 1255.6 L/s  |
| Fan Static Pressure .....                     | :           | 0.0817 kPa  |
| -----   |             |             |
| Total Pressure Difference Across Fan .....    | :           | 0.1431 kPa  |
| Static Pressure Difference Across Fan .....   | :           | 0.1431 kPa  |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa  |
| -----   |             |             |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet   |
| -----   |             |             |
| Total Pressure .....                          | -0.1431 kPa | 0.0000 kPa  |
| Static Pressure .....                         | -0.2046 kPa | -0.0614 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa  |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s    |

## Losses Upstream of Fan

|                             |   |             |
|-----------------------------|---|-------------|
| Return System Loss .....    | : | -0.1431 kPa |
| Filter Loss .....           | : | 0.0000 kPa  |
| Other Upstream Losses ..... | : | 0.0000 kPa  |
| Total Upstream Losses ..... | : | -0.1431 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| Total Downstream Losses ..... | : | 0.0000 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... : 1483.8 L/s
Fan Static Pressure ..... : 0.0748 kPa
-----
Total Pressure Difference Across Fan ..... : 0.1362 kPa
Static Pressure Difference Across Fan ..... : 0.1362 kPa
Velocity Pressure Difference Across Fan ..... : 0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... : -0.1362 kPa                0.0000 kPa
Static Pressure ..... : -0.1976 kPa                -0.0614 kPa
Velocity Pressure ..... : 0.0614 kPa                0.0614 kPa
Velocity ..... : 10.0 m/s                10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... : -0.1362 kPa
Filter Loss ..... : 0.0000 kPa
Other Upstream Losses ..... : 0.0000 kPa
Total Upstream Losses ..... : -0.1362 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... : 0.0000 kPa
Other Downstream Losses ..... : 0.0000 kPa
Total Downstream Losses ..... : 0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... : 0.0 m
Temperature ..... : 12.8 C
Relative Humidity ..... : 100.0 %
Density ..... : 1.2296 kg/cu m
Viscosity ..... : 0.0040 sqm/s
Barometric Pressure ..... : 101.3260 kPa
Vapor Pressure ..... : 1.4734 kPa
-----

```

## Fan Selection Parameters (Return System)

|   |             |             |
|---|-------------|-------------|
| Fan Airflow Rate .....                        | :           | 1410.9 L/s  |
| Fan Static Pressure .....                     | :           | 0.1073 kPa  |
| -----   |             |             |
| Total Pressure Difference Across Fan .....    | :           | 0.1687 kPa  |
| Static Pressure Difference Across Fan .....   | :           | 0.1687 kPa  |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa  |
| -----   |             |             |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet   |
| -----   |             |             |
| Total Pressure .....                          | -0.1687 kPa | 0.0000 kPa  |
| Static Pressure .....                         | -0.2301 kPa | -0.0614 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa  |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s    |

## Losses Upstream of Fan

|                             |   |             |
|-----------------------------|---|-------------|
| Return System Loss .....    | : | -0.1687 kPa |
| Filter Loss .....           | : | 0.0000 kPa  |
| Other Upstream Losses ..... | : | 0.0000 kPa  |
| Total Upstream Losses ..... | : | -0.1687 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| Total Downstream Losses ..... | : | 0.0000 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 1328.1 L/s |
| Fan Static Pressure .....                     | :           | 0.1656 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.2270 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.2270 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.2270 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.1656 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |
| -----   |             |            |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |
| -----                       |   |            |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.2270 kPa |
| Total Downstream Losses ..... | : | 0.2270 kPa |
| -----                         |   |            |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |
| *****                     |   |                |

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... :      630.1 L/s
Fan Static Pressure ..... :      0.0692 kPa
-----
Total Pressure Difference Across Fan ..... :      0.1306 kPa
Static Pressure Difference Across Fan ..... :      0.1306 kPa
Velocity Pressure Difference Across Fan ..... :      0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... :      -0.1306 kPa      0.0000 kPa
Static Pressure ..... :      -0.1920 kPa     -0.0614 kPa
Velocity Pressure ..... :      0.0614 kPa      0.0614 kPa
Velocity ..... :      10.0 m/s      10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... :      -0.1306 kPa
Filter Loss ..... :      0.0000 kPa
Other Upstream Losses ..... :      0.0000 kPa
Total Upstream Losses ..... :      -0.1306 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... :      0.0000 kPa
Other Downstream Losses ..... :      0.0000 kPa
Total Downstream Losses ..... :      0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... :      0.0 m
Temperature ..... :      12.8 C
Relative Humidity ..... :      100.0 %
Density ..... :      1.2296 kg/cu m
Viscosity ..... :      0.0040 sqm/s
Barometric Pressure ..... :      101.3260 kPa
Vapor Pressure ..... :      1.4734 kPa
-----
*****

```

## Fan Selection Parameters (Return System)

|   |             |             |
|---|-------------|-------------|
| Fan Airflow Rate .....                        | :           | 630.1 L/s   |
| Fan Static Pressure .....                     | :           | 0.0502 kPa  |
| -----   |             |             |
| Total Pressure Difference Across Fan .....    | :           | 0.1117 kPa  |
| Static Pressure Difference Across Fan .....   | :           | 0.1117 kPa  |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa  |
| -----   |             |             |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet   |
| -----   |             |             |
| Total Pressure .....                          | -0.1117 kPa | 0.0000 kPa  |
| Static Pressure .....                         | -0.1731 kPa | -0.0614 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa  |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s    |

## Losses Upstream of Fan

|                             |   |             |
|-----------------------------|---|-------------|
| Return System Loss .....    | : | -0.1117 kPa |
| Filter Loss .....           | : | 0.0000 kPa  |
| Other Upstream Losses ..... | : | 0.0000 kPa  |
| Total Upstream Losses ..... | : | -0.1117 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| Total Downstream Losses ..... | : | 0.0000 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 700.0 L/s  |
| Fan Static Pressure .....                     | :           | 0.5530 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.6144 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.6144 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.6144 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.5530 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |
| -----   |             |            |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |
| -----                       |   |            |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.6144 kPa |
| Total Downstream Losses ..... | : | 0.6144 kPa |
| -----                         |   |            |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |
| *****                     |   |                |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 700.0 L/s  |
| Fan Static Pressure .....                     | :           | 0.5338 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.5952 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.5952 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.5952 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.5338 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.5952 kPa |
| Total Downstream Losses ..... | : | 0.5952 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 700.0 L/s  |
| Fan Static Pressure .....                     | :           | 0.5380 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.5995 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.5995 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.5995 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.5380 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.5995 kPa |
| Total Downstream Losses ..... | : | 0.5995 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... :      630.1 L/s
Fan Static Pressure ..... :      0.0734 kPa
-----
Total Pressure Difference Across Fan ..... :      0.1348 kPa
Static Pressure Difference Across Fan ..... :      0.1348 kPa
Velocity Pressure Difference Across Fan ..... :      0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... :      -0.1348 kPa      0.0000 kPa
Static Pressure ..... :      -0.1962 kPa     -0.0614 kPa
Velocity Pressure ..... :      0.0614 kPa      0.0614 kPa
Velocity ..... :      10.0 m/s      10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... :      -0.1348 kPa
Filter Loss ..... :      0.0000 kPa
Other Upstream Losses ..... :      0.0000 kPa
Total Upstream Losses ..... :      -0.1348 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... :      0.0000 kPa
Other Downstream Losses ..... :      0.0000 kPa
Total Downstream Losses ..... :      0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... :      0.0 m
Temperature ..... :      12.8 C
Relative Humidity ..... :      100.0 %
Density ..... :      1.2296 kg/cu m
Viscosity ..... :      0.0040 sqm/s
Barometric Pressure ..... :      101.3260 kPa
Vapor Pressure ..... :      1.4734 kPa
-----
*****

## Fan Selection Parameters (Supply System)

|   |               |            |
|---|---------------|------------|
| Fan Airflow Rate .....                        | :             | 700.0 L/s  |
| Fan Static Pressure .....                     | :             | 0.5413 kPa |
| -----   |               |            |
| Total Pressure Difference Across Fan .....    | :             | 0.6027 kPa |
| Static Pressure Difference Across Fan .....   | :             | 0.6027 kPa |
| Velocity Pressure Difference Across Fan ..... | :             | 0.0000 kPa |
| -----   |               |            |
| Fan Inlet / Outlet Data                       | At Inlet      | At Outlet  |
| -----   |               |            |
| Total Pressure .....                          | : 0.0000 kPa  | 0.6027 kPa |
| Static Pressure .....                         | : -0.0614 kPa | 0.5413 kPa |
| Velocity Pressure .....                       | : 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | : 10.0 m/s    | 10.0 m/s   |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.6027 kPa |
| Total Downstream Losses ..... | : | 0.6027 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 1206.0 L/s |
| Fan Static Pressure .....                     | :           | 0.5261 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.5876 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.5876 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.5876 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.5261 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |
| -----   |             |            |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |
| -----                       |   |            |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.5876 kPa |
| Total Downstream Losses ..... | : | 0.5876 kPa |
| -----                         |   |            |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Supply System)

|   |             |            |
|---|-------------|------------|
| Fan Airflow Rate .....                        | :           | 1321.5 L/s |
| Fan Static Pressure .....                     | :           | 0.5812 kPa |
| -----   |             |            |
| Total Pressure Difference Across Fan .....    | :           | 0.6426 kPa |
| Static Pressure Difference Across Fan .....   | :           | 0.6426 kPa |
| Velocity Pressure Difference Across Fan ..... | :           | 0.0000 kPa |
| -----   |             |            |
| Fan Inlet / Outlet Data                       | At Inlet    | At Outlet  |
| -----   |             |            |
| Total Pressure .....                          | 0.0000 kPa  | 0.6426 kPa |
| Static Pressure .....                         | -0.0614 kPa | 0.5812 kPa |
| Velocity Pressure .....                       | 0.0614 kPa  | 0.0614 kPa |
| Velocity .....                                | 10.0 m/s    | 10.0 m/s   |

## Losses Upstream of Fan

|                             |   |            |
|-----------------------------|---|------------|
| Intake Loss .....           | : | 0.0000 kPa |
| Plenum Loss .....           | : | 0.0000 kPa |
| Return System Loss .....    | : | 0.0000 kPa |
| Filter Loss .....           | : | 0.0000 kPa |
| Coil Loss .....             | : | 0.0000 kPa |
| Other Upstream Losses ..... | : | 0.0000 kPa |
| Total Upstream Losses ..... | : | 0.0000 kPa |

## Losses Downstream of Fan

|                               |   |            |
|-------------------------------|---|------------|
| Filter Loss .....             | : | 0.0000 kPa |
| Coil Loss .....               | : | 0.0000 kPa |
| Other Downstream Losses ..... | : | 0.0000 kPa |
| System Effect Loss .....      | : | 0.0000 kPa |
| Supply System Loss .....      | : | 0.6426 kPa |
| Total Downstream Losses ..... | : | 0.6426 kPa |

## Psychrometric Properties

|                           |   |                |
|---------------------------|---|----------------|
| Altitude .....            | : | 0.0 m          |
| Temperature .....         | : | 12.8 C         |
| Relative Humidity .....   | : | 100.0 %        |
| Density .....             | : | 1.2296 kg/cu m |
| Viscosity .....           | : | 0.0040 sqm/s   |
| Barometric Pressure ..... | : | 101.3260 kPa   |
| Vapor Pressure .....      | : | 1.4734 kPa     |

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... : 1189.1 L/s
Fan Static Pressure ..... : 0.0643 kPa
-----
Total Pressure Difference Across Fan ..... : 0.1257 kPa
Static Pressure Difference Across Fan ..... : 0.1257 kPa
Velocity Pressure Difference Across Fan ..... : 0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... : -0.1257 kPa                0.0000 kPa
Static Pressure ..... : -0.1872 kPa                -0.0614 kPa
Velocity Pressure ..... : 0.0614 kPa                0.0614 kPa
Velocity ..... : 10.0 m/s                10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... : -0.1257 kPa
Filter Loss ..... : 0.0000 kPa
Other Upstream Losses ..... : 0.0000 kPa
Total Upstream Losses ..... : -0.1257 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... : 0.0000 kPa
Other Downstream Losses ..... : 0.0000 kPa
Total Downstream Losses ..... : 0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... : 0.0 m
Temperature ..... : 12.8 C
Relative Humidity ..... : 100.0 %
Density ..... : 1.2296 kg/cu m
Viscosity ..... : 0.0040 sqm/s
Barometric Pressure ..... : 101.3260 kPa
Vapor Pressure ..... : 1.4734 kPa

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... :      654.8 L/s
Fan Static Pressure ..... :      0.0443 kPa
-----
Total Pressure Difference Across Fan ..... :      0.1057 kPa
Static Pressure Difference Across Fan ..... :      0.1057 kPa
Velocity Pressure Difference Across Fan ..... :      0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... :      -0.1057 kPa      0.0000 kPa
Static Pressure ..... :      -0.1671 kPa     -0.0614 kPa
Velocity Pressure ..... :      0.0614 kPa      0.0614 kPa
Velocity ..... :      10.0 m/s      10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... :      -0.1057 kPa
Filter Loss ..... :      0.0000 kPa
Other Upstream Losses ..... :      0.0000 kPa
Total Upstream Losses ..... :      -0.1057 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... :      0.0000 kPa
Other Downstream Losses ..... :      0.0000 kPa
Total Downstream Losses ..... :      0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... :      0.0 m
Temperature ..... :      12.8 C
Relative Humidity ..... :      100.0 %
Density ..... :      1.2296 kg/cu m
Viscosity ..... :      0.0040 sqm/s
Barometric Pressure ..... :      101.3260 kPa
Vapor Pressure ..... :      1.4734 kPa
-----

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... :      658.8 L/s
Fan Static Pressure ..... :      0.0751 kPa
-----
Total Pressure Difference Across Fan ..... :      0.1366 kPa
Static Pressure Difference Across Fan ..... :      0.1366 kPa
Velocity Pressure Difference Across Fan ..... :      0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... :      -0.1366 kPa      0.0000 kPa
Static Pressure ..... :      -0.1980 kPa     -0.0614 kPa
Velocity Pressure ..... :      0.0614 kPa      0.0614 kPa
Velocity ..... :      10.0 m/s      10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... :      -0.1366 kPa
Filter Loss ..... :      0.0000 kPa
Other Upstream Losses ..... :      0.0000 kPa
Total Upstream Losses ..... :      -0.1366 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... :      0.0000 kPa
Other Downstream Losses ..... :      0.0000 kPa
Total Downstream Losses ..... :      0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... :      0.0 m
Temperature ..... :      12.8 C
Relative Humidity ..... :      100.0 %
Density ..... :      1.2296 kg/cu m
Viscosity ..... :      0.0040 sqm/s
Barometric Pressure ..... :      101.3260 kPa
Vapor Pressure ..... :      1.4734 kPa
-----

```

## Fan Selection Parameters (Return System)

```

-----
Fan Airflow Rate ..... :      8550.0 L/s
Fan Static Pressure ..... :      0.0304 kPa
-----
Total Pressure Difference Across Fan ..... :      0.0919 kPa
Static Pressure Difference Across Fan ..... :      0.0919 kPa
Velocity Pressure Difference Across Fan ..... :      0.0000 kPa
-----
Fan Inlet / Outlet Data                At Inlet                At Outlet
-----
Total Pressure ..... :      -0.0919 kPa                0.0000 kPa
Static Pressure ..... :      -0.1533 kPa               -0.0614 kPa
Velocity Pressure ..... :      0.0614 kPa                0.0614 kPa
Velocity ..... :      10.0 m/s                10.0 m/s
-----

```

## Losses Upstream of Fan

```

-----
Return System Loss ..... :      -0.0919 kPa
Filter Loss ..... :      0.0000 kPa
Other Upstream Losses ..... :      0.0000 kPa
Total Upstream Losses ..... :      -0.0919 kPa
-----

```

## Losses Downstream of Fan

```

-----
Filter Loss ..... :      0.0000 kPa
Other Downstream Losses ..... :      0.0000 kPa
Total Downstream Losses ..... :      0.0000 kPa
-----

```

## Psychrometric Properties

```

-----
Altitude ..... :      0.0 m
Temperature ..... :      12.8 C
Relative Humidity ..... :      100.0 %
Density ..... :      1.2296 kg/cu m
Viscosity ..... :      0.0040 sqm/s
Barometric Pressure ..... :      101.3260 kPa
Vapor Pressure ..... :      1.4734 kPa

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

Notas:

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014. Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva. Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo. El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética. Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

| (PVE int/ limit) Potencia del ventilador específica interna máxima | 125 / 230 W/(m³/s) |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 0,71 %             |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,44 %             |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

| Máximo caudal de fuga externa a -400 Pa (RU)                       | 0,45 %             |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|  |   |
|--|---|
| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
| Sistema de recuperación  | Recuperador de placas                     |

| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,62 %                                    |

Notas:

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014. Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva. Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo. El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética. Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

Acero inoxidable V2A suelo techo lateral

No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

Intercambiador, Recuperador vertical, Paquete de placas FG AL 09 N 1000 R 1 AE SC

Compuerta de by-pass estanca clase 2 según DIN EN 1751 / 7 Nm par de giro / eje de accionamiento 15 x 15 mm

Bandeja 1308 KGT

Salida de condensados: DN32, 1 1/4 Pulgadas

Alumbrado, 230V LED, montado y cableado

**(4) Batería de calor**

Acero inoxidable V2A suelo techo lateral  
Toma de presión conducida hasta el exterior del equipo  
Montaje caja de clemas con interruptor de mantenimiento montado y cableado., AR 4/5,5  
Mirilla  
Alumbrado, 230V LED, montado y cableado  
Puerta de acceso, Puerta de acceso en dirección de aire

Resumen de accesorios

- Acero inoxidable V2A suelo techo lateral
- 6 Alumbrado, 230V LED, montado y cableado

**Ficha técnica**

CL-02222 Almacen limpio quirofanos

Número de oferta

JP-49140 / 08

Fecha

27/06/2024

- 6 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
|--|---|
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 78 / 43 Pa                                |
| DeltaP WRG (seco) Imp. / Ret.                                      | 188 / 172 Pa                              |
| DeltaPs,int  | 481 Pa                                    |
| DeltaPs, adicional   | 424 Pa                                    |
| Eficiencia recuperador/objetivo                                    | 73 / 73 %                                 |
| Vent. eta opt. EU:327/2011   | (8) 69,1% (17) 67,4%                      |
| Grado de eficiencia N  | (8) 73,7 / (17) 75,4                      |
| Vent. eta stat. eingebaut  | (8) 61,3% (17) 51,9%                      |
| (PVE int/ limit) Potencia del ventilador específica interna máxima | 848 / 907 W/(m³/s)                        |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,06 %                                    |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,66 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

Acero inoxidable V2A suelo techo lateral

Toma de presión conducida hasta el exterior del equipo

Montaje caja de clemas con interruptor de mantenimiento montado y cableado., AR 4/5,5

Mirilla

Alumbrado, 230V LED, montado y cableado

Puerta de acceso, Puerta de acceso en dirección de aire

**Resumen de accesorios**

Acero inoxidable V2A suelo techo lateral

6 Alumbrado, 230V LED, montado y cableado

6 Mirilla

1 Mirilla con posibilidad de oscurecimiento

1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

2 Puerta de acceso

1 Puerta de acceso

5 Puerta de acceso

2 Toma de presión conducida hasta el exterior del equipo

**Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)**

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|                                 |   |

Notas:

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014. Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva. Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo. El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética. Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

Datos técnicos

Impulsión

(1) Filtro ISO polvo grueso 60%

| EN ISO 16890   | ISO Coarse 60% |
|--|----------------|
| Pérdida de carga inicial (limpio)  | 18 Pa          |
| Pérdida de carga seleccionada  | 36 Pa          |
| Pérdida de carga final   | 54 Pa          |
| Energieverbrauch (Eurovent 4/21: -)  | - kWh          |
| Superficie del filtro  | 1,11 m²        |
| Compuerta de la clase 2 según la DIN EN 1751, Q exterior, 917 x 917 / 7 Nm par de giro / eje de accionamiento 15 x 15 mm |                |
| Pérdida de carga   | 1 Pa           |

Acero inoxidable V2A suelo techo lateral  
Filtro sin marco G4  
Rieles para filtro de manta, Rieles de filtro de manta

Acero inoxidable V2A suelo techo lateral

No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

Intercambiador, Recuperador vertical, Paquete de placas FG AL 12 N 750 U 1 AE SC

Compuerta de by-pass estanca clase 2 según DIN EN 1751 / 15 Nm par de giro / eje de accionamiento 15 x 15 mm

Bandeja de condensado, Bandeja con salida de condensados, Bandeja 1010

Salida de condensados: DN32, 1 1/4 Pulgadas

Alumbrado, 230V LED, montado y cableado

**(4) Batería de calor**

- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|  |   |
|--|---|
| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 64 / 35 Pa                                |
| DeltaP WRG (seco) Imp. / Ret.                                      | 155 / 142 Pa                              |
| DeltaPs,int  | 396 Pa                                    |
| DeltaPs, adicional   | 288 Pa                                    |
| Eficiencia recuperador/objetivo                                    | 76 / 73 %                                 |
| Vent. eta opt. EU:327/2011   | (8) 66,1% (17) 67,4%                      |
| Grado de eficiencia N  | (8) 71,7 / (17) 75,4                      |
| Vent. eta stat. eingebaut  | (8) 63,8% (17) 51%                        |
| (PVE int/ limit) Potencia del ventilador específica interna máxima | 690 / 1012 W/(m³/s)                       |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,23 %                                    |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,76 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

Acero inoxidable V2A suelo techo lateral  
Toma de presión conducida hasta el exterior del equipo  
Montaje caja de clemas con interruptor de mantenimiento montado y cableado., AR 4/5,5  
Mirilla  
Alumbrado, 230V LED, montado y cableado  
Puerta de acceso, Puerta de acceso en dirección de aire

Resumen de accesorios

- Acero inoxidable V2A suelo techo lateral
- 5 Alumbrado, 230V LED, montado y cableado
- 5 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 7 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|                                 |   |
|---------------------------------|---|
| Tipo de equipo                  | Unidad de ventilación bidireccional (UVB) |

Notas:

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014. Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva. Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo. El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética. Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

**(3) Recuperador de calor de placas de alta eficacia, vertical****Precalentamiento del aire exterior (WRG)**

|   |           |
|---|-----------|
| Temperatura exterior  | -4,9 °C   |
| Humedad relativa de aire exterior   | 90 %      |
| Temperatura del retorno   | 22,0 °C   |
| Humedad relativa del retorno  | 50,0 %    |
| Datos referidos a la temperatura del aire exterior  |           |
| Temperatura del aire exterior mínima  | -7,0 °C   |
| Temperatura de impulsión  | 16,7 °C   |
| Humedad relativa de impulsión   | 19 %      |
| Grado de transferencia de temperatura seca según EN 308                                   | 73 %      |
| Factor de recuperación de calor   | 81 %      |
| Potencia térmica  | 39,4 kW   |
| Condensado  | 16,0 kg/h |
| Temperatura de descarga   | 5,6 °C    |
| Pérdida de carga en impulsión (Densidad estándar Rho 1,2)                                 | 185 Pa    |
| Pérdida de carga en retorno (Densidad estándar Rho 1,2)                                   | 169 Pa    |
| Consumo de energía eléctrica debido a la pérdida de presión                               | 0,90 kW   |
| Coeficiente de rendimiento  | 29,90     |
| Eficiencia energética   | 71 %      |
| Clase de recuperador según EN 13053/2020  | H2        |
| Máx. porcentaje de fugas  | 0,25 %    |
| Tasa de recuperación de calor (calculado mediante la fórmula del Instituto Passive House) | 81,3 %    |

**Preenfriamiento del aire exterior (WRG)**

|                                   |          |
|-----------------------------------|----------|
| Temperatura exterior              | 35,6 °C  |
| Humedad relativa de aire exterior | 27,0 %   |
| Temperatura del retorno           | 24,0 °C  |
| Humedad relativa del retorno      | 40,0 %   |
| Temperatura de impulsión          | 27,3 °C  |
| Humedad relativa de impulsión     | 43 %     |
| Factor de recuperación de calor   | 71 %     |
| Potencia térmica                  | 15,2 kW  |
| Condensado                        | 0,0 kg/h |
| Temperatura de descarga           | 32,7 °C  |

No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

Intercambiador, KGXD con bypass, Paquete de placas SV-120/AX/0750"

Compuerta de by-pass estanca clase 2 según DIN EN 1751 / 15 Nm par de giro / eje de accionamiento 15 x 15 mm

Bandeja de condensado, Bandeja con salida de condensados, Bandeja 1010

|---|--------|
| Máximo caudal de fuga de aire exterior a +400 Pa (RU) | 1,03 % |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)  | 0,64 % |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

| Valores característicos                             | según DIN EN 1886: T2, TB 2, D1, L1, F9;  |                     |

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

Datos técnicos

Impulsión

(1) Filtro ISO polvo grueso 60%

| EN ISO 16890   | ISO Coarse 60% |
|--|----------------|
| Pérdida de carga inicial (limpio)  | 21 Pa          |
| Pérdida de carga seleccionada  | 42 Pa          |
| Pérdida de carga final   | 63 Pa          |
| Energieverbrauch (Eurovent 4/21: -)  | - kWh          |
| Superficie del filtro  | 1,26 m²        |
| Compuerta de la clase 2 según la DIN EN 1751, Q exterior, 612 x 1527 / 15 Nm par de giro / eje de accionamiento 15 x 15 mm |                |
| Pérdida de carga   | 2 Pa           |

Filtro sin marco G4  
Rieles para filtro de manta, Rieles de filtro de manta  
Puerta de acceso

(2) Filtro ISO ePM1 50%

| EN ISO 16890                        | ISO ePM1 50% |
|-------------------------------------|--------------|
| Pérdida de carga inicial (limpio)   | 74 Pa        |
| Pérdida de carga seleccionada       | 124 Pa       |
| Pérdida de carga final              | 174 Pa       |
| Energieverbrauch (Eurovent 4/21: -) | 1660 kWh     |
| Superficie del filtro               | 13,48 m²     |

(3) Recuperador de calor de placas de alta eficacia, vertical

|   |           |
|---|-----------|
| <b>Precalentamiento del aire exterior (WRG)</b>   |           |
| Temperatura exterior  | -4,9 °C   |
| Humedad relativa de aire exterior   | 90 %      |
| Temperatura del retorno   | 22,0 °C   |
| Humedad relativa del retorno  | 50,0 %    |
| Datos referidos a la temperatura del aire exterior  |           |
| Temperatura del aire exterior mínima  | -4,9 °C   |
| Temperatura de impulsión  | 16,3 °C   |
| Humedad relativa de impulsión   | 19 %      |
| Grado de transferencia de temperatura seca según EN 308                                   | 73 %      |
| Factor de recuperación de calor   | 79 %      |
| Potencia térmica  | 40,0 kW   |
| Condensado  | 15,7 kg/h |
| Temperatura de descarga   | 6,0 °C    |
| Pérdida de carga en impulsión (Densidad estándar Rho 1,2)                                 | 169 Pa    |
| Pérdida de carga en retorno (Densidad estándar Rho 1,2)                                   | 154 Pa    |
| Consumo de energía eléctrica debido a la pérdida de presión                               | 0,90 kW   |
| Coeficiente de rendimiento  | 32,10     |
| Eficiencia energética   | 71 %      |
| Clase de recuperador según EN 13053/2020  | H2        |
| Máx. porcentaje de fugas  | 0,25 %    |
| Tasa de recuperación de calor (calculado mediante la fórmula del Instituto Passive House) | 81,4 %    |
| <b>en modo de desescarche (ca. 3.5 °C FOL)</b>  |           |
| Temperatura de aire de impulsión  | 16,3 °C   |
| <b>Preenfriamiento del aire exterior (WRG)</b>  |           |
| Temperatura exterior  | 35,6 °C   |
| Humedad relativa de aire exterior   | 27,0 %    |
| Temperatura del retorno   | 24,0 °C   |
| Humedad relativa del retorno  | 40,0 %    |
| Temperatura de impulsión  | 27,3 °C   |
| Humedad relativa de impulsión   | 44 %      |
| Factor de recuperación de calor   | 72 %      |
| Potencia térmica  | 15,7 kW   |
| Condensado  | 0,0 kg/h  |
| Temperatura de descarga   | 32,7 °C   |

No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

Alumbrado, 230V LED, montado y cableado  
Puerta de acceso, Puerta de acceso en dirección de aire

Resumen de accesorios

- 6 Alumbrado, 230V LED, montado y cableado
- 6 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|  |   |
|--|---|
| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 74 / 40 Pa                                |
| DeltaP WRG (seco) Imp. / Ret.                                      | 169 / 154 Pa                              |
| DeltaPs,int  | 437 Pa                                    |
| DeltaPs, adicional   | 387 Pa                                    |
| Eficiencia recuperador/objetivo                                    | 73 / 73 %                                 |
| Vent. eta opt. EU:327/2011   | (8) 69,1% (16) 68,8%                      |
| Grado de eficiencia N  | (8) 75,5 / (16) 76,4                      |
| Vent. eta stat. eingebaut  | (8) 64,7% (16) 56,8%                      |
| (PVE int/ limit) Potencia del ventilador específica interna máxima | 717 / 871 W/(m³/s)                        |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,1 %                                     |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,68 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

| Tasa de recuperación de calor (calculado mediante la fórmula del Instituto Passive House) | 81,1 %    |

**en modo de desescarche (ca. 3.5 °C FOL)**

|                                  |         |
|----------------------------------|---------|
| Temperatura de aire de impulsión | 16,5 °C |
|----------------------------------|---------|

**Preenfriamiento del aire exterior (WRG)**

|                                   |          |
|-----------------------------------|----------|
| Temperatura exterior              | 35,6 °C  |
| Humedad relativa de aire exterior | 27,0 %   |
| Temperatura del retorno           | 24,0 °C  |
| Humedad relativa del retorno      | 40,0 %   |
| Temperatura de impulsión          | 27,1 °C  |
| Humedad relativa de impulsión     | 44 %     |
| Factor de recuperación de calor   | 73 %     |
| Potencia térmica                  | 16,9 kW  |
| Condensado                        | 0,0 kg/h |
| Temperatura de descarga           | 32,5 °C  |

No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

Toma de presión conducida hasta el exterior del equipo  
Montaje caja de clemas con interruptor de mantenimiento montado y cableado., AR 4/5,5  
Mirilla  
Alumbrado, 230V LED, montado y cableado  
Puerta de acceso, Puerta de acceso en dirección de aire

Resumen de accesorios

- 6 Alumbrado, 230V LED, montado y cableado
- 6 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|  |   |
|--|---|
| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 78 / 45 Pa                                |
| DeltaP WRG (seco) Imp. / Ret.                                      | 184 / 184 Pa                              |
| DeltaPs,int  | 491 Pa                                    |
| DeltaPs, adicional   | 412 Pa                                    |
| Eficiencia recuperador/objetivo                                    | 73 / 73 %                                 |
| Vent. eta opt. EU:327/2011   | (9) 69,1% (16) 69,1%                      |
| Grado de eficiencia N  | (9) 75,5 / (16) 75,5                      |
| Vent. eta stat. eingebaut  | (9) 65,2% (16) 63,3%                      |
| (PVE int/ limit) Potencia del ventilador específica interna máxima | 764 / 853 W/(m³/s)                        |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,07 %                                    |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,66 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

Puerta de acceso, Puerta de acceso en dirección de aire

Resumen de accesorios

- Acero inoxidable V2A suelo techo lateral
- 6 Alumbrado, 230V LED, montado y cableado
- 6 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento

**Ficha técnica**

CL-0206 camas hospital de día

- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|  |   |
|--|---|
| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 74 / 40 Pa                                |
| DeltaP WRG (seco) Imp. / Ret.                                      | 198 / 180 Pa                              |
| DeltaPs,int  | 492 Pa                                    |
| DeltaPs, adicional   | 365 Pa                                    |
| Eficiencia recuperador/objetivo                                    | 74 / 73 %                                 |
| Vent. eta opt. EU:327/2011   | (8) 69,1% (17) 69,2%                      |
| Grado de eficiencia N  | (8) 75,5 / (17) 77,2                      |
| Vent. eta stat. eingebaut  | (8) 63,1% (17) 63,7%                      |
| (PVE int/ limit) Potencia del ventilador específica interna máxima | 776 / 926 W/(m³/s)                        |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,11 %                                    |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,69 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

Datos técnicos

Impulsión

(1) Filtro ISO polvo grueso 60%

| EN ISO 16890   | ISO Coarse 60% |
|--|----------------|
| Pérdida de carga inicial (limpio)  | 20 Pa          |
| Pérdida de carga seleccionada  | 40 Pa          |
| Pérdida de carga final   | 60 Pa          |
| Energieverbrauch (Eurovent 4/21: -)  | - kWh          |
| Superficie del filtro  | 0,51 m²        |
| Compuerta de la clase 2 según la DIN EN 1751, Q exterior, 612 x 612 / 7 Nm par de giro / eje de accionamiento 15 x 15 mm |                |
| Pérdida de carga   | 2 Pa           |

Resumen de accesorios

- 5 Alumbrado, 230V LED, montado y cableado
- 4 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 2 Puerta de acceso
- 4 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|                                 |   |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

Resumen de accesorios

- 5 Alumbrado, 230V LED, montado y cableado
- 5 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|  |   |
|--|---|
| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 42 / 45 Pa                                |

| (PVE int/ limit) Potencia del ventilador específica interna máxima | 368 / 962 W/(m³/s)                        |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,04 %                                    |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,65 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

| Factor de recuperación de calor   | 82 %      |
| Potencia térmica  | 37,4 kW   |
| Condensado  | 14,7 kg/h |
| Temperatura de descarga   | 5,2 °C    |
| Pérdida de carga en impulsión (Densidad estándar Rho 1,2)                                 | 168 Pa    |
| Pérdida de carga en retorno (Densidad estándar Rho 1,2)                                   | 153 Pa    |
| Consumo de energía eléctrica debido a la pérdida de presión                               | 0,80 kW   |
| Coeficiente de rendimiento  | 33,60     |
| Eficiencia energética   | 74 %      |
| Clase de recuperador según EN 13053/2020  | H1        |
| Máx. porcentaje de fugas  | 0,25 %    |
| Tasa de recuperación de calor (calculado mediante la fórmula del Instituto Passive House) | 84,3 %    |
| <b>en modo de desescarche (ca. 3.5 °C FOL)</b>  |           |
| Temperatura de aire de impulsión  | 17,3 °C   |
| <b>Preenfriamiento del aire exterior (WRG)</b>  |           |
| Temperatura exterior  | 35,6 °C   |
| Humedad relativa de aire exterior   | 27,0 %    |
| Temperatura del retorno   | 24,0 °C   |
| Humedad relativa del retorno  | 40,0 %    |
| Temperatura de impulsión  | 26,9 °C   |
| Humedad relativa de impulsión   | 44 %      |
| Factor de recuperación de calor   | 75 %      |
| Potencia térmica  | 14,6 kW   |
| Condensado  | 0,0 kg/h  |
| Temperatura de descarga   | 33,1 °C   |

No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

Intercambiador, Recuperador vertical, Paquete de placas AG AL 09 N 750+500 C 1 AE SC

**Ficha técnica**

CL-0203 MANTENIMIENTO Y TALLERES

Número de oferta

JP-49140 / 23

Fecha

26/06/2024

Compuerta de by-pass estanca clase 2 según DIN EN 1751 / 10 Nm par de giro / eje de accionamiento 15 x 15 mm

Bandeja 1608 KGT

Salida de condensados: DN32, 1 1/4 Pulgadas

Alumbrado, 230V LED, montado y cableado

**(4) Batería de calor**

Puerta de acceso, Puerta de acceso en dirección de aire

Resumen de accesorios

- 5 Alumbrado, 230V LED, montado y cableado
- 4 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|                                 |   |

| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,62 %               |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

Resumen de accesorios

- 5 Alumbrado, 230V LED, montado y cableado
- 5 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso
- 2 Toma de presión conducida hasta el exterior del equipo

Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

Notas:

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014. Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.  
Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.  
El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética. Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

Toma de presión conducida hasta el exterior del equipo  
Montaje caja de clemas con interruptor de mantenimiento montado y cableado., AR 4/5,5  
Mirilla  
Alumbrado, 230V LED, montado y cableado  
Puerta de acceso, Puerta de acceso en dirección de aire

Resumen de accesorios

- 6 Alumbrado, 230V LED, montado y cableado
- 5 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 2 Puerta de acceso
- 4 Puerta de acceso

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|  |   |
|--|---|
| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 53 / 30 Pa                                |
| DeltaP WRG (seco) Imp. / Ret.                                      | 110 / 110 Pa                              |
| DeltaPs,int  | 303 Pa                                    |
| DeltaPs, adicional   | 246 Pa                                    |
| Eficiencia recuperador/objetivo                                    | 75 / 73 %                                 |
| Vent. eta opt. EU:327/2011   | (8) 67,6% (16) 67%                        |
| Grado de eficiencia N  | (8) 79,6 / (16) 79                        |
| Vent. eta stat. eingebaut  | (8) 57,3% (16) 58,6%                      |
| (PVE int/ limit) Potencia del ventilador específica interna máxima | 523 / 1093 W/(m³/s)                       |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,4 %                                     |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,87 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

5 Mirilla

1 Mirilla con posibilidad de oscurecimiento

1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

2 Puerta de acceso

6 Puerta de acceso

2 Toma de presión conducida hasta el exterior del equipo

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
|--|---|
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 82 / 44 Pa                                |
| DeltaP WRG (seco) Imp. / Ret.                                      | 196 / 179 Pa                              |
| DeltaPs,int  | 501 Pa                                    |
| DeltaPs, adicional   | 388 Pa                                    |
| Eficiencia recuperador/objetivo                                    | 73 / 73 %                                 |
| Vent. eta opt. EU:327/2011   | (8) 69,2% (16) 69,1%                      |
| Grado de eficiencia N  | (8) 71,7 / (16) 75,5                      |
| Vent. eta stat. eingebaut  | (8) 56,2% (16) 64,1%                      |
| (PVE int/ limit) Potencia del ventilador específica interna máxima | 842 / 873 W/(m³/s)                        |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,04 %                                    |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,64 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

Intercambiador, KGXD con bypass, Paquete de placas KV-085/P1-750 + KV-085/P1-500  
Compuerta de by-pass estanca clase 2 según DIN EN 1751 / 10 Nm par de giro / eje de accionamiento 15 x 15 mm  
Bandeja 1608 KGT  
Salida de condensados: DN32, 1 1/4 Pulgadas  
Alumbrado, 230V LED, montado y cableado

(4) Batería de calor

5 Mirilla

1 Mirilla con posibilidad de oscurecimiento

1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

2 Puerta de acceso

6 Puerta de acceso

2 Toma de presión conducida hasta el exterior del equipo

## Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

| Tipo de equipo   | Unidad de ventilación bidireccional (UVB) |
|--|---|
| Sistema de recuperación  | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret.  | 85 / 46 Pa                                |
| DeltaP WRG (seco) Imp. / Ret.                                      | 186 / 170 Pa                              |
| DeltaPs,int  | 487 Pa                                    |
| DeltaPs, adicional   | 446 Pa                                    |
| Eficiencia recuperador/objetivo                                    | 74 / 73 %                                 |
| Vent. eta opt. EU:327/2011   | (8) 66,1% (16) 69,1%                      |
| Grado de eficiencia N  | (8) 71,7 / (16) 75,5                      |
| Vent. eta stat. eingebaut  | (8) 60,6% (16) 62,4%                      |
| (PVE int/ limit) Potencia del ventilador específica interna máxima | 794 / 867 W/(m³/s)                        |
| Máximo caudal de fuga de aire exterior a +400 Pa (RU)              | 1,01 %                                    |
| Máximo caudal de aire de fuga externa a -400 Pa (RU)               | 0,62 %                                    |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

| Eficiencia energética RLT                           | A+  |                      |
| Valores característicos                             | según DIN EN 1886: T2, TB 2, D1, L1, F9;  |                      |

La información resumida en esta página se proporciona como una visión general y destaca las características importantes que en algunos casos sólo se aplican a partes del dispositivo en general. El diseño y el equipamiento exactos de las distintas unidades funcionales se describen en el apartado "Datos técnicos". Los símbolos en gris y tachados indican las opciones disponibles que no han sido seleccionadas por el cliente.

Datos técnicos

Impulsión

(1) Filtro ISO polvo grueso 60%

| EN ISO 16890  | ISO Coarse 60% |
|---|----------------|
| Pérdida de carga inicial (limpio)   | 22 Pa          |
| Pérdida de carga seleccionada   | 44 Pa          |
| Pérdida de carga final  | 66 Pa          |
| Energieverbrauch (Eurovent 4/21: -)   | - kWh          |
| Superficie del filtro   | 1,54 m²        |
| Compuerta de la clase 2 según la DIN EN 1751, Q exterior, 917 x 1222 / 7 Nm par de giro / eje de accionamiento 15 x 15 mm |                |
| Pérdida de carga  | 2 Pa           |

Filtro sin marco G4  
 Rieles para filtro de manta, Rieles de filtro de manta  
 Puerta de acceso, Sujeta puerta - palanca de cierre

(2) Filtro ISO ePM1 50%

| EN ISO 16890                        | ISO ePM1 50% |
|-------------------------------------|--------------|
| Pérdida de carga inicial (limpio)   | 77 Pa        |
| Pérdida de carga seleccionada       | 127 Pa       |
| Pérdida de carga final              | 177 Pa       |
| Energieverbrauch (Eurovent 4/21: -) | 1660 kWh     |
| Superficie del filtro               | 16,18 m²     |

Filtro de bolsa F7 (energía optimizada)

Bastidor deslizante con palanca de sujeción, filtro extraíble

Mirilla

Puerta de acceso, Sujeta puerta - palanca de cierre

**(3) Recuperador de calor de placas de alta eficacia, vertical****Precalentamiento del aire exterior (WRG)**

|   |           |
|---|-----------|
| Temperatura exterior  | -4,9 °C   |
| Humedad relativa de aire exterior   | 90 %      |
| Temperatura del retorno   | 22,0 °C   |
| Humedad relativa del retorno  | 50,0 %    |
| Datos referidos a la temperatura del aire exterior  |           |
| Temperatura del aire exterior mínima  | -7,0 °C   |
| Temperatura de impulsión  | 16,8 °C   |
| Humedad relativa de impulsión   | 19 %      |
| Grado de transferencia de temperatura seca según EN 308                                   | 73 %      |
| Factor de recuperación de calor   | 81 %      |
| Potencia térmica  | 51,5 kW   |
| Condensado  | 21,0 kg/h |
| Temperatura de descarga   | 5,6 °C    |
| Pérdida de carga en impulsión (Densidad estándar Rho 1,2)                                 | 173 Pa    |
| Pérdida de carga en retorno (Densidad estándar Rho 1,2)                                   | 158 Pa    |
| Consumo de energía eléctrica debido a la pérdida de presión                               | 1,10 kW   |
| Coeficiente de rendimiento  | 31,90     |
| Eficiencia energética   | 71 %      |
| Clase de recuperador según EN 13053/2020  | H2        |
| Máx. porcentaje de fugas  | 0,25 %    |
| Tasa de recuperación de calor (calculado mediante la fórmula del Instituto Passive House) | 81,4 %    |

**Preenfriamiento del aire exterior (WRG)**

|                                   |          |
|-----------------------------------|----------|
| Temperatura exterior              | 35,6 °C  |
| Humedad relativa de aire exterior | 27,0 %   |
| Temperatura del retorno           | 24,0 °C  |
| Humedad relativa del retorno      | 40,0 %   |
| Temperatura de impulsión          | 27,3 °C  |
| Humedad relativa de impulsión     | 43 %     |
| Factor de recuperación de calor   | 71 %     |
| Potencia térmica                  | 19,9 kW  |
| Condensado                        | 0,0 kg/h |
| Temperatura de descarga           | 32,7 °C  |

No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.

Intercambiador, KGXD con bypass, Paquete de placas SV-120/AX/1000"

Compuerta de by-pass estanca clase 2 según DIN EN 1751 / 15 Nm par de giro / eje de accionamiento 15 x 15 mm

Bandeja de condensado, Bandeja con salida de condensados, Bandeja Alu 1310 KGT  
Salida de condensados: DN32, 1 1/4 Pulgadas  
Alumbrado, 230V LED, montado y cableado

(4) Batería de calor

|                                       |                                 |
|---------------------------------------|---------------------------------|
| Tipo de batería                       | 3 Cu/Al LT                      |
| Conexión (entrada/salida)             | 1 1/2 Pulgadas - 1 1/2 Pulgadas |
| Temperatura de aire de entrada        | -4,9 °C                         |
| Temperatura de aire de salida         | 24 °C                           |
| Potencia (total)                      | 68,38 kW                        |
| Entrada del medio                     | 60 °C                           |
| Salida del medio                      | 45 °C                           |
| Cantidad de líquido                   | 3,98 m³/h                       |
| Protección antihielo                  | 0 %                             |
| Pérdida de carga en el lado del aire  | 26 Pa                           |
| Pérdida de carga en el lado del medio | 7,76 kPa                        |
| Velocidad del aire                    | 2,15 m/s                        |
| Contenido de agua                     | 9,83 l                          |
| Densidad del aire                     | 1,2 kg/m³                       |

(5) módulo vacío con bandeja 915 para humectador 41,9 Kg/h

Bandeja en acero inoxidable 1309 KGT salida de condensados a la izquierda  
Salida de condensados: DN32, 1 1/4 Pulgadas  
Mirilla  
Alumbrado, 230V LED, montado y cableado

(6) Batería de frío

|   |                                 |
|---|---------------------------------|
| Tipo de batería                             | W/28/1047/3R/17K/2.6Cu,12/Al-L1 |
| Conexión (entrada/salida)                   | DN 40, 1 1/2" - DN 40, 1 1/2"   |
| Temperatura de aire de entrada              | 36,5 °C                         |

Montaje caja de clemas con interruptor de mantenimiento montado y cableado., AR 4/5,5  
Mirilla  
Alumbrado, 230V LED, montado y cableado  
Puerta de acceso, Puerta de acceso en dirección de aire, Sujeta puerta - palanca de cierre

Resumen de accesorios

- 6 Alumbrado, 230V LED, montado y cableado
- 6 Mirilla
- 1 Mirilla con posibilidad de oscurecimiento
- 1 No se ha seleccionado en el recuperador de placas ninguna bandeja de condensados en el lado del aire de impulsión, por lo que sólo puede funcionar en verano en condiciones en las que no se produzca condensado.
- 2 Puerta de acceso
- 6 Puerta de acceso
- 8 Sujeta puerta - palanca de cierre
- 2 Toma de presión conducida hasta el exterior del equipo

Notas

Al tratarse de un equipo de intemperie se tiene que proteger el humectador. Protección por parte del instalador.

Directiva ErP -Nr.:1253/2014 (unidades de tratamiento de aire no residencial)

Esta UTA cumple con los requisitos del Reglamento (UE) N°:1253/2014 ; Equipos de ventilación fase 2 (2018); (Requisito ErP 2018).

|                           |   |
|---------------------------|---|
| Tipo de equipo            | Unidad de ventilación bidireccional (UVB) |
| Sistema de recuperación   | Recuperador de placas                     |
| DeltaP Filtro Imp. / Ret. | 77 / 42 Pa                                |

**Notas:**

El cumplimiento de la ErP se basa en nuestro conocimiento actual del reglamento europeo Nr. 1253/2014.

Los cambios debidos a acuerdos posteriores entre las asociaciones y los reguladores pueden hacer que este equipo deje de cumplir la directiva.

Por esta razón, los datos técnicos y el método de cálculo sólo se pueden garantizar para la fecha en la que se configuró el equipo.

El cambio regular de los filtros del equipo es importante para mantener en rendimiento y la eficiencia energética.

Para cumplir con los requisitos del Reglamento (UE) 1253/2014, es obligatorio instalar en la máquina indicadores de presión diferencial en filtros o un avisador acústico en el controlador.

## **2.2.- BOMBAS**

El diseño de la bomba incluye un sistema de extracción superior que facilita el desmontaje del cabezal motor (el motor, el cabezal de la bomba y el impulsor) con fines de mantenimiento o reparación sin necesidad de desconectar las tuberías de la carcasa de la bomba.                 </div> <div>                     La bomba está equipada con un cierre de fuelle de caucho no equilibrado. El cierre mecánico satisface los requisitos establecidos por la norma EN 12756. La conexión de las tuberías se lleva a cabo por medio de bridas DIN de PN 6/10 (normas EN 1092-2 e ISO 7005-2).                 </div> <div>                     La bomba está equipada con un motor asíncrono refrigerado por ventilador.                 </div> <div> <div>Paneles control:</div> <div> <div>Frequency converter:</div> <div>None</div> </div> </div> <div> <div>Líquido:</div> <div> <div>Líquido bombeado:</div> <div>Agua</div> </div> <div> <div>Rango de temperatura del líquido:</div> <div>-25 .. 120 °C</div> </div> <div> <div>Temperatura del líquido durante el funcionamiento:</div> <div>20 °C</div> </div> <div> <div>Densidad:</div> <div>998.2 kg/m³</div> </div> <div> <div>Viscosidad cinemática:</div> <div>1 mm2/s</div> </div> </div> <div> <div>Técnico:</div> <div> <div>Velocidad predeterminada:</div> <div>2840 rpm</div> </div> <div> <div>Caudal real calculado:</div> <div>2.394 m³/h</div> </div> <div> <div>Altura resultante de la bomba:</div> <div>15.39 m</div> </div> <div> <div>Diámetro real del impulsor:</div> <div>118 mm</div> </div> <div> <div>Código del cierre:</div> <div>BQQE</div> </div> <div> <div>Tolerancia de curva:</div> <div>ISO9906:2012 3B2</div> </div> </div> <div> <div>Materiales:</div> <div> <div>Cuerpo hidráulico:</div> <div>Fundición</div> </div> <div> <div>Carcasa de la bomba:</div> <div>                     EN-GJL-250<br/>                     ASTM class 35                 </div> </div> <div> <div>Impulsor:</div> <div>                     Acero inoxidable<br/>                     EN 1.4301<br/>                     AISI 304                 </div> </div> </div> <div> <div>Instalación:</div> <div> <div>Rango de temperaturas ambientes:</div> <div>-30 .. 40 °C</div> </div> <div> <div>Presión de trabajo máxima:</div> <div>10 bar</div> </div> <div> <div>Presión máxima a la temp. declarada:</div> <div>10 bar / 120 °C</div> </div> <div> <div>Tipo de conexión:</div> <div>DIN</div> </div> <div> <div>Tamaño de la conexión:</div> <div>DN 32</div> </div> <div> <div>Presión nominal para la conexión:</div> <div>PN 6/10</div> </div> <div> <div>Longitud puerto a puerto:</div> <div>280 mm</div> </div> <div> <div>Tamaño de la brida del motor:</div> <div>FT100</div> </div> </div> <div> <div>Datos eléctricos:</div> <div> <div>Tipo de motor:</div> <div>80B</div> </div> <div> <div>Potencia nominal - P2:</div> <div>0.55 kW</div> </div> <div> <div>Frecuencia de red:</div> <div>50 Hz</div> </div> <div> <div>Tensión nominal:</div> <div>1 x 220-230 V</div> </div> </div> </div> </div> </div> |

| <b>Información general:</b>                               |   |
| Producto::  | NKGE 150-125-315/336<br>AA1F2AESBQQESW3 |
| Código::  | 93036257                                |
| Número EAN::  | 5715123313603                           |
| <b>Técnico:</b>   |   |
| Velocidad de bomba en la que se basan los datos de bomba: | 1449 rpm                                |
| Caudal real calculado:                                    | 263 m³/h                                |
| Bomba con motor:  | Y                                       |
| Altura resultante de la bomba:                            | 34 m                                    |
| Diámetro real del impulsor:                               | 336 mm                                  |
| Diámetro nominal del impulsor:                            | 315                                     |
| Tipo de impulsor:   | Standard                                |
| Diámetro del eje:   | 42 mm                                   |
| Código del cierre:  | BQQE                                    |
| Tipo de cierre mecánico:                                  | Single                                  |
| Tolerancia de curva:                                      | ISO9906:2012 3B                         |
| Versión de la bomba:                                      | A1                                      |
| Diseño rodamiento:  | Standard                                |
| <b>Materiales:</b>  |   |
| Cuerpo hidráulico:  | Fundición                               |
| Carcasa de la bomba:                                      | EN-GJL-250                              |
| Carcasa de la bomba:                                      | ASTM class 35                           |
| Mat. de anillo de desgaste:                               | Latón                                   |
| Impulsor:   | Fundición                               |
| Impulsor:   | EN-GJL-200                              |
| Impulsor:   | ASTM class 30                           |
| Internal pump house coating:                              | CED                                     |
| Código de material:                                       | A                                       |
| Código para caucho:                                       | E                                       |
| Eje:  | Stainless steel                         |
| Eje:  | EN 1.4301                               |
| Eje:  | AISI 304                                |
| <b>Instalación:</b>                                       |   |
| Rango de temperaturas ambientes:                          | -10 .. 50 °C                            |
| Presión de trabajo máxima:                                | 16 bar                                  |
| Normativa de conexión de tubería:                         | EN 1092-2                               |
| Tipo de conexión de entrada:                              | DIN                                     |
| Tipo de conexión de salida:                               | DIN                                     |
| Tamaño de la conexión de entrada:                         | DN 150                                  |
| Tamaño de la conexión de salida:                          | DN 125                                  |
| Presión nominal para la conexión:                         | PN 16                                   |
| Tipo de acoplamiento:                                     | Flexible w/o spacer                     |
| Base frame design:  | EN/ISO                                  |
| Code for base frame:                                      | 9B ST                                   |
| Grouting (Yes/No):  | N                                       |
| Código de conexión:                                       | F                                       |
| <b>Líquido:</b>   |   |
| Líquido bombeado:   | Agua                                    |
| Rango de temperatura del líquido:                         | -25 .. 120 °C                           |
| Temperatura del líquido durante el funcionamiento:        | 20 °C                                   |
| Densidad:   | 998.2 kg/m³                             |
| Viscosidad cinemática:                                    | 1 mm2/s                                 |
| <b>Datos eléctricos:</b>                                  |   |
| Tipo de motor:  | 225S                                    |
| Potencia nominal - P2:                                    | 37 kW                                   |
| Frecuencia de red:  | 50 Hz                                   |

| Descripción                          | Valor                        |
|--------------------------------------|------------------------------|
| Tensión nominal:                     | 3 x 400 V                    |
| Intensidad nominal:                  | 70 A                         |
| Cos phi - factor de potencia:        | 0.95                         |
| Velocidad nominal:                   | 150-1500 rpm                 |
| Clase eficiencia IE:                 | IE5                          |
| Eficiencia del motor a carga total:  | 94.7 %                       |
| Número de polos:                     | 4                            |
| Grado de protección (IEC 34-5):      | IP55                         |
| Clase de aislamiento (IEC 85):       | F                            |
| Protección de motor integrada:       | PTC/PT1                      |

## CVTT

CVTT-25/25-7.5KW-550RPM/4-IE3 SANDWICH

Caja de ventilación construida en chapa de acero galvanizado y aislamiento termoacústico de melamina, equipada con ventilador centrífugo de álabes adelante montado sobre soportes antivibratorios y junta flexible a la descarga, accionado por motor a transmisión trifásico IP55. Modelo con panel de doble pared, tipo sándwich, y aislamiento acústico ininflamable (M0) de fibra de vidrio de 17mm de espesor. Disponible bajo demanda. Marca S&P modelo CVTT-25/25-7.5kW-550rpm/4-IE3 SANDWICH para un caudal 8.489 l/s y presión estática 177 Pa.

### Dimensiones

## **2.5.- VASOS DE EXPANSIÓN**

## PRODUCCION DE FRIO - VASO DE EXPANSION G 3000

### Datos generales

Tipo de aplicación : Circuitos cerrados  
 Tipo de vaso : Sin transferencia de masa  
 Modelo de vaso : G 3000  
 Temperatura de llenado : 10.0 °C

### Volumen de agua

El volumen de la instalación : Es conocido  
 N° de tramos a calcular : 1  
 Volumen de la instalación : 104000.0 litros

### Datos de cálculo

Concentración de etilenglicol : 0.0 %  
 Presión estática : 45.0 m  
 Presión mínima - tª mínima : 5.5 bar  
 Presión máxima - tª máxima : 6.5 bar  
 Presión de la válvula de seguridad : 7.0 bar

### Tramos

| Volumen  | Tª mínima | Tª máxima |
|----------|-----------|-----------|
| 104000 l | 7 °C      | 25 °C     |

### Modelo seleccionado

Vaso de expansión principal : 1 x G 3000

### Datos técnicos del conjunto

Presión máxima de trabajo : 10 bar  
 Pres. vaso sin conectar al circuito : 5.3 bar  
 Cap. de acumulación necesaria : 2301.6 litros  
 Expansión total de la instalación : 297.4 litros  
 Volumen de agua en el vaso a  
 - temperatura mínima : 92.3 litros  
 - temperatura de llenado : 113.1 litros

### Dimensiones del vaso G 3000

Anchura (D) : 1500.0 mm  
 Altura (H) : 2580.0 mm  
 Diámetro de conexiones (A) : DN 65  
 Peso : 870.0 kg

### Croquis del vaso G 3000

### Características del tipo Thermopress G

- Para sistemas de calefacción y climatización.
- Conexiones embridadas PN6 a 6 bar y PN10 a 10 bar.
- Membrana recambiable.
- Temp. máxima del vaso: 70°C.
- Temp. máxima de la instalación: 120°C.
- Homologación según directiva 97/23/CE de aparatos a presión.
- Con orificio de inspección.
- Con manómetro en el lado del nitrógeno.
- Color gris.
- Presión inicial : 3.5 bar

## DISTRIBUCION DE FRIO- VASO DE EXPANSION G 3000

## **2.6.-ENFRIADORAS**

## EWASH19TZSSD2

- > Air cooled chiller
- > Inverter driven single screw compressor
- > Silver Efficiency
- > Standard sound configuration
- > R513A refrigerant

- ➔ **Unit description:** Daikin air-cooled chiller with inverter driven screw compressor and R513A refrigerant. Unit colour is ivory White (Munsell code 5Y7.5/1) (±RAL7044).
- ➔ **Compressor:** Semi-hermetic single screw compressor type with integrated Variable Frequency Drive (VFD) designed by Daikin to achieve optimized performances at full capacity as well as in part-load conditions. The capacity is continuously modulated by the integrated VFD. The drive is cooled directly by the refrigerant allowing for continuous operation regardless environmental condition (unlike the air cooled and glycol cooled drives). Gold and Platinum versions are also equipped with Variable Volume Ratio (VVR) technology to further enhance compression efficiency during part load operation.
- ➔ **Evaporator:** The single circuit unit is equipped with direct expansion plate to plate evaporator made of stainless-steel brazed plates with an electric heater for protection against freezing and Victaulic type water connections as standard. The dual circuit unit is equipped with direct expansion shell & tube evaporator with enhanced copper tubes rolled into steel tube sheets for maximum heat transfer. The evaporators are single-pass on both refrigerant and water sides with low refrigerant pressure drops and Victaulic type water connections as standard.
- ➔ **Condenser:** Full Aluminum – Microchannel type is provided as standard configuration. It is made entirely of aluminum with flat tubes containing small channels. Full-depth louvered aluminum fins are inserted between the tubes maximizing the heat exchange. The microchannel technology ensures the highest performance with the minimum surface for the exchanger. The quantity of refrigerant charge is reduced if compared to tubes and fins condenser. Cu/Al - Tube & fins type is available as option. It is manufactured with internally enhanced seamless copper tubes arranged in a staggered row pattern and mechanically expanded into lanced and rippled aluminum air side heat exchanger fins with full fin collars. An integral sub-cooler circuit provides sub-cooling to effectively eliminate liquid flashing and increase cooling capacity without increasing the power input.
- ➔ **Condenser fans:** The condenser fans are propeller type with high efficiency design blades developed by Daikin to maximize performances. Standard units are equipped with AC motor fans, EC motors are available as option to enhance efficiency at part load, to reduce sound and extend operating range towards negative ambient temperatures.
- ➔ **Refrigerant circuit:** Each unit has one or two independent refrigerant circuits and each one includes: Compressor, Refrigerant, Evaporator, Air Cooled Condenser, Electronic expansion valve, Sight glass with moisture indicator, Filter drier, Charging valves, High pressure switch, High pressure transducers, Low pressure transducers, Oil pressure transducers and Suction temperature sensor.
- ➔ **Electrical:** Power and control are in the main panel that is manufactured to ensure protection against all weather conditions. It is IP54 and internally protected against possible accidental contact with live parts when the doors are open. The main panel is fitted with interlocked main switch door that interrupts power supply when opening.

## EWASH19TZSSD2

- > Air cooled chiller
- > Inverter driven single screw compressor
- > Silver Efficiency
- > Standard sound configuration
- > R513A refrigerant

**Controller:** New MicroTech 4 controller provides an easy-to-use control environment. The control logic is designed to provide maximum efficiency, to continue operation in unusual operating conditions and to provide history of unit operation. Easy interface with, BACnet, Ethernet TCP/IP or Modbus communications. Master/Slave operation is provided as standard allowing to connect 4 units working as single system.

## Unit Overview

| Model Number  | Efficiency version | Sound configuration | Power supply       |
|---------------|--------------------|---------------------|--------------------|
| EWASH19TZSSD2 | Silver             | Standard            | 400 V / 50 Hz / 3~ |

Performances calculated according to EN14511-3

## Cooling mode performances

|                        |                        |                |                |
|------------------------|------------------------|----------------|----------------|
| Cooling capacity       | 1801 kW                | IPLV.IP        | 5.756 kW / kW  |
| Power input            | 842.6 kW               | SEER           | 5.076 kW / kW  |
| Cooling Efficiency EER | 2.137 kW / kW          | $\eta_{s,c}$   | 200.0 %        |
| F1_lwlp_15m            | 102 dB(A) / 66.0 dB(A) | SEPR           | 6.016 kW / kW  |
| Ambient temperature    | 40.0 °C                |                |                |
| Evaporator             |                        |                |                |
| Fluid IN/OUT           | 12.00 °C / 7.00 °C     | Fluid Flow     | 85.83 l/s      |
| Pressure Drops         | 66.3 kPa               | Fouling Factor | 0.00e+0°C m²/W |
| Fluid                  | Water                  |                |                |

SEER declared according to EN14825, fan coil application 12/7°C (inlet/outlet) water temperatures. SEPR declared according to EN14825, high temperature process cooling application (not Eurovent certified). Sound power level according to ISO 9614-1. IPLV.IP and seasonal efficiency data generally refer to standard unit without option.

## Unit information

|                    |          |                        |              |
|--------------------|----------|------------------------|--------------|
| Capacity control   | Stepless | Condenser fans control | Brushless    |
| Compressor type    | Screw    | Condenser type         | Microchannel |
| Compressor N°      | 2        | Condenser fans N°      | 24           |
| Circuit N°         | 2        | Nominal air flow       | 152940 l/s   |
| Refrigerant type   | R513A    | Evaporator type        | ShellAndTube |
| Refrigerant charge | 270 kg   | Altitude               | 650 m        |

Refrigerant charge data is intended as guideline only, refer to unit nameplate for specific value.

## Electrical information

|                      |                    |                            |                          |
|----------------------|--------------------|----------------------------|--------------------------|
| Power supply         | 400 V / 50 Hz / 3~ | Compressor starting method | Variable Frequency Drive |
| Running current      | 1378 A             | Max. current wires sizing  | 1621 A                   |
| Max. Running current | 1608 A             | Max. inrush current        | 0.00 A                   |

Voltage tolerance  $\pm 10\%$ . Phase Voltage unbalance  $\pm 3\%$ . Electrical data are referred to base unit without additional options, refer to unit nameplate for specific value.

## Acoustic information

### Sound pressure level at 1 m from the unit (rif. $2 \times 10^{-5}$ Pa)

| 63 Hz | 125 Hz | 250 Hz | 500 Hz | 1000 Hz | 2000 Hz | 4000 Hz | 8000 Hz | db(A) |
|-------|--------|--------|--------|---------|---------|---------|---------|-------|
| 86.7  | 78.3   | 78.2   | 78.0   | 75.3    | 67.6    | 61.3    | 58.0    | 79.3  |

Values referred to Evap. IN/OUT 12/7°C and 35°C Amb, full load operation, to base unit without additional options. Sound pressure level calculated from sound power level. Sound pressure in octave band is for intended as guideline only and not considered binding.

## Physical information

|                           |                     |        |          |
|---------------------------|---------------------|--------|----------|
| Connections size          | 273 mm              | Length | 13568 mm |
|                           |                     | Width  | 2238 mm  |
| Weight shipping/operating | 11471 kg / 12482 kg | Height | 2553 mm  |

Information referred to standard unit configuration without options, refer to certified unit drawing.

Specifications are subject to change without any prior notice.

The certified standard performances and the certified software tool version can be verified in [www.eurovent-certification.com](http://www.eurovent-certification.com)

## Options

|      |  |
|------|--|
| 220  | MOBILE APP HMI (ACCESS POINT ONLY)                           |

## Envelope chart

## Certification notes

Within the scope of AHRI Air-Cooled Water-Chilling Packages Certification Program. AHRI Certified performance may be obtained from the manufacturer's representative

Certified in accordance with Eurovent Certification Program: Liquid Chilling Packages and Heat Pumps (LCP-HP). Standard ratings are specified in the section "Rating requirements" of the Rating Standards. All standard ratings are verified by tests conducted in accordance with the following standards: EN 14511-3 (performance testing) and ISO 9614 (acoustic testing).
